

Academic integrity — discussion draft

DEMONSTRATION / DRAFT — not an approved institutional publication.

Purpose

This draft offers discussion points for a future institutional policy. It has no disciplinary authority and needs review and approval by the institution.

Attribution and original work

Keep accurate source notes, mark direct quotations, cite borrowed ideas and distinguish your own analysis. Ask your course team which citation style and collaboration rules apply.

Responsible use of tools

Ask which digital tools are permitted for each assessment. Keep records of assistance received and disclose it as instructed by the course team. Check sources and factual claims yourself.

Fair assessment

A formal policy should define permitted collaboration, suspected misconduct review, notice to students, opportunities to respond, impartial decision-making and appeal routes. These procedures and sanctions are not established by this draft.

Questions

Seek written guidance from the institution before submitting assessed work. This draft does not replace assessment instructions.
